Dear Science Teacher

The enclosed D Files are a result of collaboration between CLRC Daresbury Laboratory, science teachers and Local Authority Science Advisors. Their aim is to help teachers teach the science content of the National Curriculum and to make science fun for the students. Please complete and return the questionnaire to enable us to continue to improve our schools programme.

All the experiments contained in the Files can easily be carried out in school laboratories with the exception of those in Plastic Surprises. This file is intended as a 'thought exercise', however, the experiments are feasible but could prove expensive and possibly dangerous if carried out in school laboratories or at home.

The Laboratory acknowledges the assistance of Mr Stuart Webster, senior science advisor for Cheshire LEA and members of the team he assembled. Other members are: Ms Annette Drake, science advisor, Cheshire LEA, Ms Sue Wells, Frodsham High School, Mr Joe Burke, Holmes Chapel Comprehensive School, and Mr Chris Clements, Sutton High School.

Yours faithfully

A handwritten signature in black ink that reads 'Anne Humphreys'.
